Data and Cloud: SQL Server, Snowflake, Python, Azure, Microsoft Fabric, ETL/ELT, Dimensional Modeling

Migrations: Dynamics 365 to Salesforce, SQL Server to Snowflake, Azure Data Pipelines

Delivery: GitLab CI/CD, Agile/Scrum, Stakeholder Management, Data Quality and Governance

Experience

Business Intelligence Analyst | Russell Investments

Aug 2024 - Aug 2026 | Mumbai, India

- Led Dynamics 365 to Salesforce and SQL Server to Snowflake migrations on Azure; embedded Power BI in Salesforce.
- Automated CEO/COO reporting in Python, eliminating manual decks for C-suite and board reviews.
- Built Power BI dashboards and a Microsoft Fabric proof of concept for liquidity and AUM analysis at a $300B+ asset manager.
- Increased sales effectiveness by 15% by building SQL market intelligence models.
- Lifted institutional client retention by 10% with data-driven tracking built with regional sales directors.

Business Intelligence Analyst | Morningstar India (PitchBook)

May 2022 - Nov 2023 | Mumbai, India

- Improved sales forecast accuracy by 50% with predictive regression models, cutting error from 40% to under 20%.
- Cut reporting processing time by 30% by automating pipelines with GitLab CI/CD.
- Delivered Power BI reporting adopted by 15+ business units and 2,000+ employees.
- Deployed 15+ automated alerts, cutting weekly QA time from 15 to 5 hours.
- Maintained 99% data accuracy through schema audits and user surveys.

Power BI Developer Intern | iNeuron.ai

Dec 2021 - Jan 2022 | Remote

- Built Power BI dashboards tracking 10+ KPIs for leadership reporting.
- Improved data usability by 20% with Python and SQL cleaning and modeling scripts.
